**Everyone
should have
access to
clean water.**

I would like to have a fundraiser for people who don't have clean water around the world. It's important to me because I feel that everyone should be able to have clean water and kids are getting really sick.

The organization's name is **Charity Water**.

Charity Water is a non profit organization to give people safe drinking water who don't have it or need it in Africa, Libya, India and other places in the world.

100% of all the money goes towards the people who need it.

There was a 9 year-old girl who wanted to raise \$300 instead of receiving gifts for her birthday and she came up \$80 short. Her mom told her that she would do better next year. One month later the girl was in a tragic car accident and when people heard about the story people started to donate. They ended up raising \$1.2 million.

Please consider my request and **DONATE YOUR CHANGE.**
